

Wenxin Chen

cwx@umich.edu · github.com/legallchaperone · Ann Arbor, MI (starting Fall 2026)

Education

University of Michigan, Ann Arbor

Sep 2026 – Expected May 2028

B.S.E., Computer Science

Shanghai Jiao Tong University – University of Michigan Joint Institute

Sep 2024 – Expected Aug 2028

B.Eng., Electrical and Computer Engineering

GPA: 3.78/4.0 | Top 10%

- **Relevant Coursework:** MATH186: Honors Mathematics II (A+), EECS280: Programming & Elem. Data Structures (A), MATH217: Linear Algebra.

Publications

- W. Gu, T. Luo, Q. Zhang, M. Ye, X. Shen, **W. Chen**, Y. Li, Y. Zhang, J. Hong, B.-L. Lu, W.-L. Zheng. “**CerebraGloss: Instruction-Tuning a Large Vision-Language Model for Fine-Grained Clinical EEG Interpretation.**” *ICLR 2026*.
- W. Gu, **W. Chen**, B.-L. Lu, W.-L. Zheng. “**BrainTune: An Artifact-Aware Meta-Contrastive Framework for Fast and Lasting Personalization of EEG Emotion Models.**” *Under Review*.

Research Experience

BCMI Lab, Shanghai Jiao Tong University

May 2025 – Dec 2025

Undergraduate Research Assistant | Advisor: Prof. Wei-Long Zheng

Project 1 — CerebraGloss

(ICLR 2026)

- Implemented the instruction-following data generation pipeline; engineered one-shot prompts for Gemini 2.5 Flash to synthesize diverse EEG-text samples (description, complex MCQ, multi-turn conversation), producing the 94K dataset used for Stage 2 instruction tuning.
- Contributed to the unified training, inference, and evaluation framework; assisted with debugging and validating experimental protocols.
- Demonstrated that targeted **instruction tuning on domain-specific data** enables a 3B model to surpass GPT-4o by 10 points on MCQ accuracy, highlighting the gap between scale and task-specific supervision.

Project 2 — BrainTune

(Under Review)

- Extended the framework to two additional EEG datasets, validating cross-dataset generalization under strong individual variability and cross-session settings.

Technical Skills

Languages Python, PyTorch, C/C++, MATLAB, $\LaTeX$

Tools Git, Linux, Bash, Docker, HuggingFace Transformers

ML/AI LLM Instruction Tuning, Vision-Language Models, Transformer Architectures.

Communication TOEFL 115/120 (Speaking 29/30)

Academic Experience

Teaching Assistant — Honors Mathematics II

Fall 2025

- Selected as TA for an advanced calculus/analysis course; held office hours and provided learning support to 90+ students.
- Held weekly recitation classes; developed course materials including slides using $\text{\LaTeX}$;
- Responsible for homework and exam paper grading.

Student Union, Technology Division — SJTU-UM Joint Institute

2024 – 2025

- Organized technical workshops (Linux, VSCode) and received the Outstanding Member award.

Honors & Awards

Team Gold Medal, University Physics Competition (UPC)

Fall 2024

Outstanding Member, Student Union Technology Division

2024–2025
